EXAMINER'S COMMENT AND STATEMENT OF REASONS FOR ALLOWANCE

Comment on Submissions

This communication is responsive to submission of 22 September 2003.

Allowable Subject Matter

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art does not disclose or fairly suggest a simultaneously detecting radiation device for detecting radiation of different wavelengths comprising base modules arranged one above the other.

The examiner notes that while it is known in the art for a radiation detecting device to simultaneously detect radiation of different wavelengths (see for example *Boppart et al. - US 6,485,413* – at Fig. 1, col. 4, lines 64-67), the prior art does not fairly suggest multiple modules or an arrangement of base modules stacked one above the other.

Regarding independent claim 7, the prior art does not disclose or fairly suggest a radiation device comprising of a base module with a coaxial arrangement of a first bore with the central axis of the base module where a number of other bores are arranged in a rotationally symmetrically with the first bore.

The examiner notes that while it is known in the art for a base module of a radiation detector to comprise a reflecting element such as a mirror or a beam splitter (see for example *Boppart et al. - US 6,485,413* – Fig. 16b, col. 25, lines 58-62), the prior art does not fairly suggest a coaxial arrangement of the first bore and a

symmetrical arrangement between the first bore and a number of other bores of the base modules to receive a reflecting element.

The remaining claims are allowable based on their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
